DIGITAL FOR ALL

TECHNO DREAMS GROUP **DIGITAL FOR ALL**

More than 18 years of experience in software development

and support of medical, banking and especially sports organizations both in Ukraine and in Europe

We use vast experience, conduct research in information security

We are a professional team that works with the storage and transmission of critical data. Our specialists have been developing, implementing and supporting cyber security in various organizations for more than 16 years

The peculiarities of the organization are the presence of NDH

(research group) that works with innovative solutions and startups. Among the many developments of the group and studies - there are technologies that we meet in the management of medical data and in telemedicine, banking and accounting, automation of sports marketing and automation of sports organization, digitization of processes and data, data storage

Languages and technologies used:

PHP, JavaScript, Ajax.js, React.js, Node.js, C++, C#, Delphi, Objective-C, Swift, Java, Kotlin, bitrix, .NET framework, WPF, MVC, MSSQL, MySQL, MongoDB

Worked on state projects for the last 3 years, gained experience in developing according to state standards and developing documentation

The team provides a full cycle of product development, implementation and support:

development of documentation, design, layout, development of sites, applications, server and software configuration, project implementation and support

THE SPECIAL FEATURES OF OUR PRODUCTS ARE THEIR FOCUS ON INFORMATION SECURITY

OUR TECHNOLOGIES

WEB DESIGN, WEB DEVELOPMENT, MOBILE APPS DEVELOPMENT IOS AND ANDROID - WE REALIZE YOUR DREAM IN TECHNODREAMSGROUP

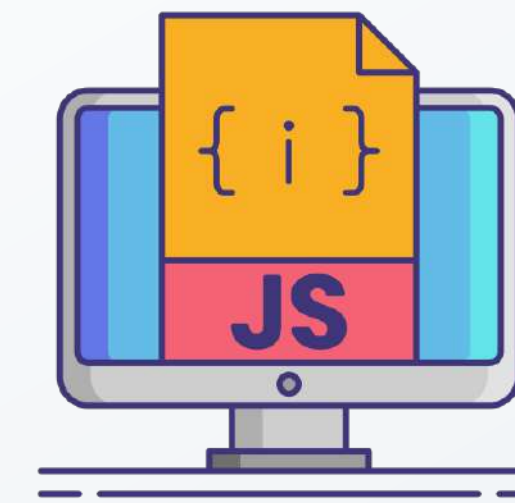

Website layout:

HTML, CSS, Bootstrap, JS, JQuery, TS SCSS, SASS, Ajax

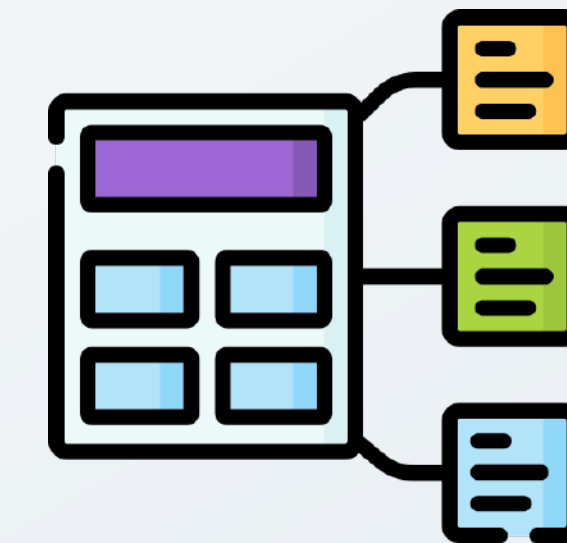

PHP Technologies:

PHP 5-8, Laravel, RestAPI on PHP, CMS Bitrix, WordPress, Joomla

JS Technologies:

JS Native, Node.js, Node.js express, React.js, Vue.js, Redux, Angular, Socket.io

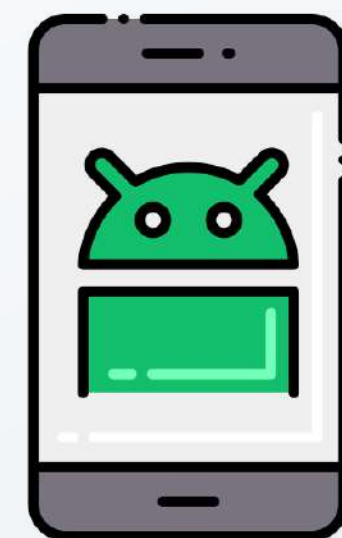

Related technologies:

SOLID, MVVM, MVP, Rest API, WebSocket, SIP, Asterisk PBX, Firebase, JSON, UnitTests, Nuke, OpenMaps SDK, GoogleMaps SDK, Jira, JIRA, Git, Gitlab, Docker, MS SQL Server, MySQL, MongoDB, Active Directory, Cloudflare.

Apple iOS technologies:

Objective-c, Swift, VIPER, Firebase (Messaging, Storage, Firestore, Crashlytics), SQLite, SwiftUI, RX Swift, UIKit

Android technologies:

Java, Kotlin, Okhttp, Retrofit2, Room, Realm, LiveData, Dagger2, Coroutines, RxJava2, AndroidX, Glide

Microsoft technologies:

C#, NET Framework 4.7, .NET 6, ASP.NET MVC, WCF, WebAPI, SignalR, Nhibernate

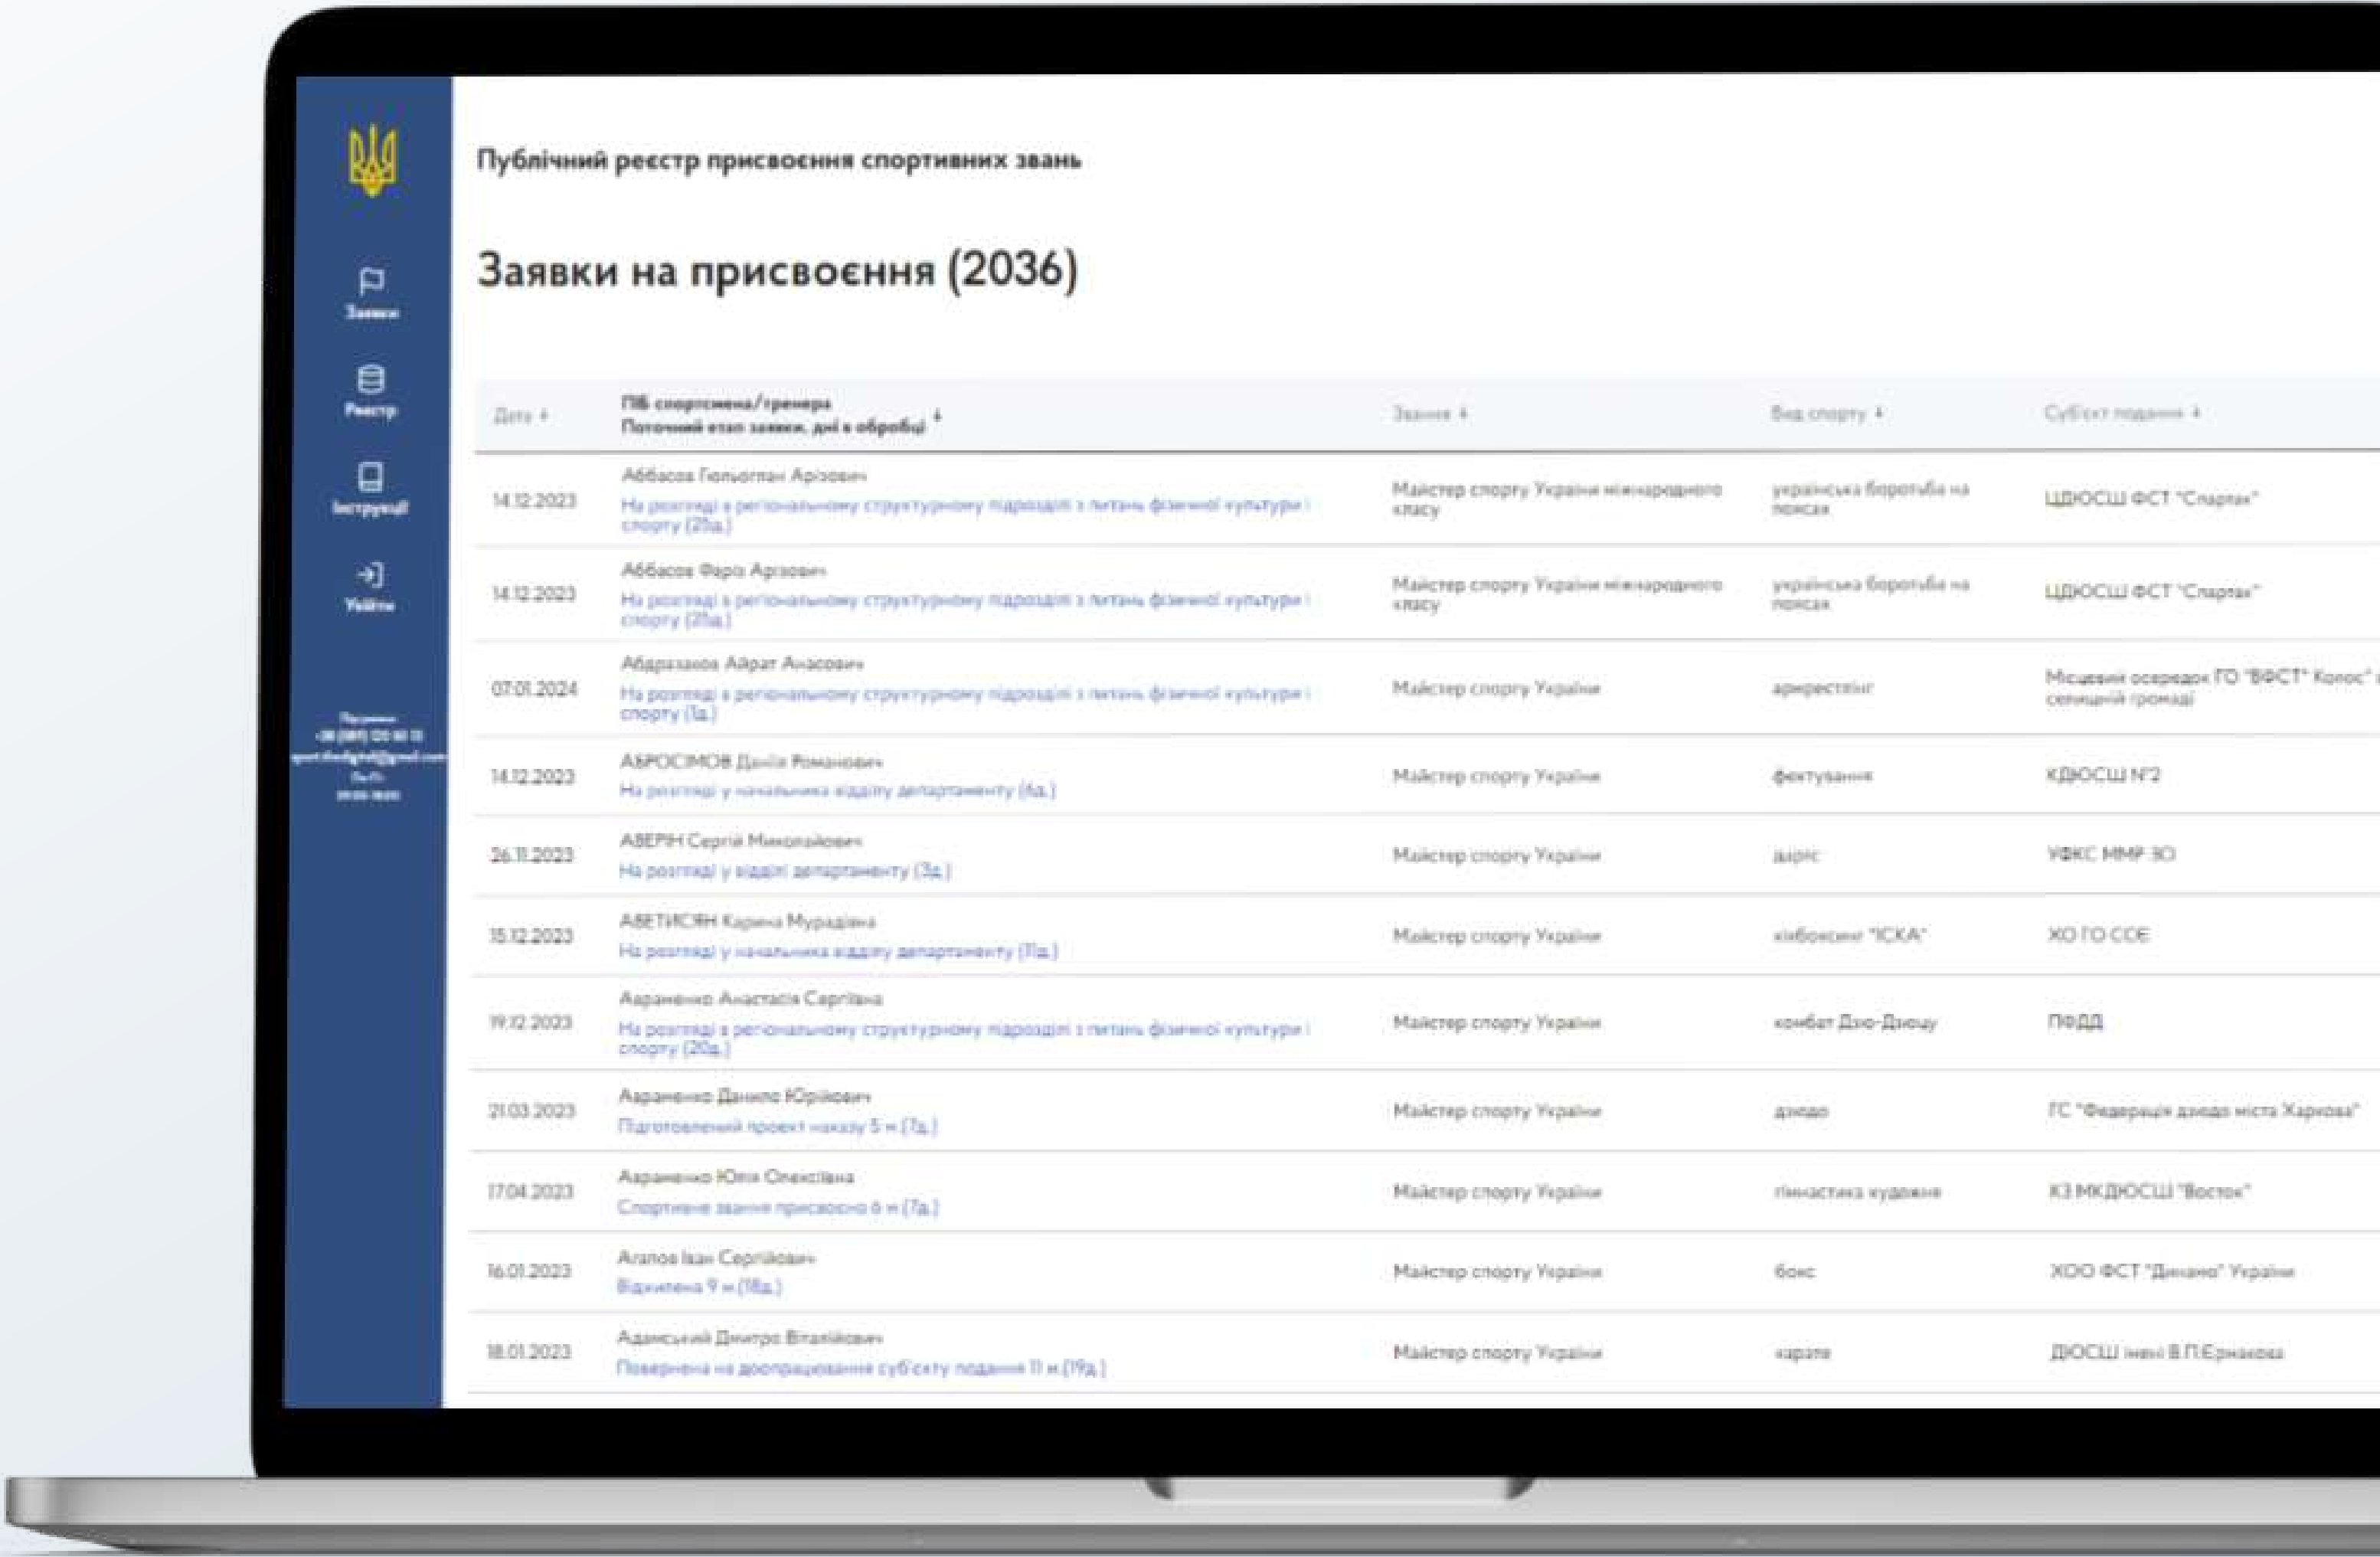

PUBLIC REGISTER ASSIGNMENT OF SPORTS TITLES

WEBSITE:
TITLE.MMS.GOV.UA

Information system "Online service for transferring to the public sphere the process of assigning sports titles from sports officially recognized in Ukraine"
(hereinafter – the System) works in test operation mode

All applications for the award of sports titles are submitted and considered in the usual mode, but can additionally be duplicated electronically in the System

Submitting an application in electronic form will give you the opportunity to coordinate with the regional structural unit for physical culture and sports
(hereinafter – RegionSport) a package of documents before physical submission, track the application processing in real time and see the comments of officials

Публічний реєстр присвоєння спортивних звань

Заявки на присвоєння (2036)

Дата	ПІБ спортсмена/тренера Поточний етап заявки, дії в обробці	Звання	Вид спорту	Суб'єкт подання
14.12.2023	Аббасов Голіоглан Арізович На розгляді в регіональному структурному підрозділі з питань фізичної культури і спорту (23а.)	Майстер спорту України міжнародного класу	українська боротьба на поясах	ЦДЮСШ ФСТ "Спартак"

WEWE PHONE: ANONYMOUS PROTECTED AND SECURE MODERN MESSENGER

WEBSITE:
WELTWELLE.COM

Implemented applications:
for iOS, Android and Web applications

**The server infrastructure has been installed, configured
and maintained:**
Asterisk, Meteor, MongoDB

Languages and technologies:
PHP7, JavaScript, Swift, Objective-C, Kotlin, CMS Bitrix

INFORMATION AND COMMUNICATION SYSTEM "ACTIVE PARKS": IMPLEMENTATION OF A SOCIAL PROJECT UNDER THE PRESIDENT'S PROGRAM OF UKRAINE "ACTIVE PARKS - LOCATIONS OF HEALTHY UKRAINE"

WEBSITE:
AP.SPORTFORALL.GOV.UA

The web platform of the project, which supports:

- creating, viewing, searching on the map, editing data, contacting the coordinator, collecting statistical data on visits to active parks
- creation, viewing, search, editing of data, involvement in participation, collection of statistical data about the participants involved in the project activities
- creation, editing, joining clubs, functionality of a separate section for each club with its own news, events, etc.
- implementation of the functionality of active routes - creation throughout Ukraine, display on the map, search, assistance in searching the area, assistance in passing along the route

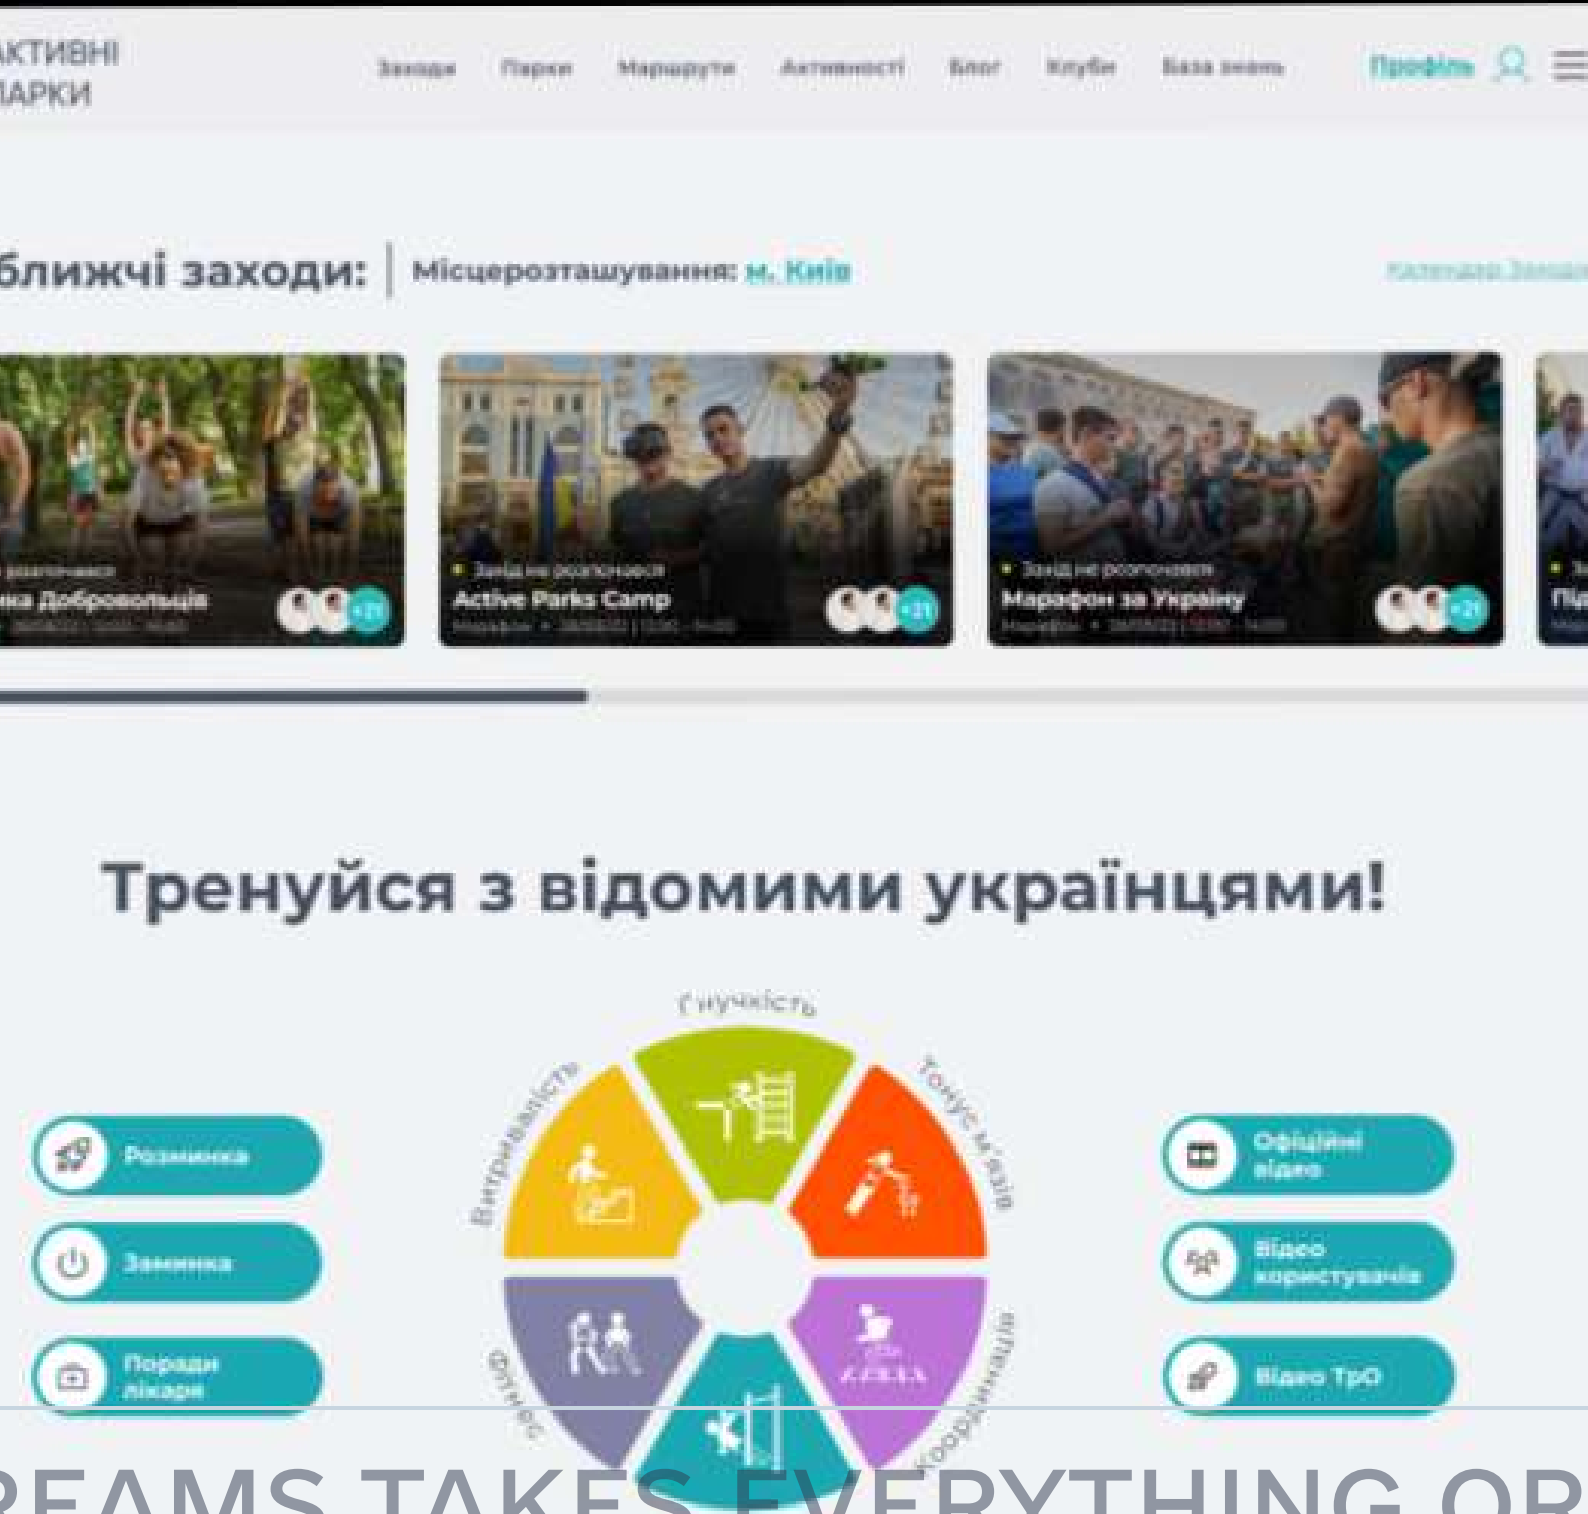

Implementation of the functionality of the platform in the form of applications for iOS, AppleWatch and Android

Customization of free services and support for their operation within the framework of the project – a video conferencing system (for online events) and a mapping service (for displaying a map and working with geodata)

As part of the work with this project, 2 large-scale revisions were carried out

The web part of the project is implemented on React.js, the backend is Node.js, the iOS application is developed on Objective-C and Swift, the Android application is Java and Kotlin

INFORMATION SYSTEM FOR MANAGEMENT ACTIVITIES OF YOUTH CENTERS OF UKRAINE

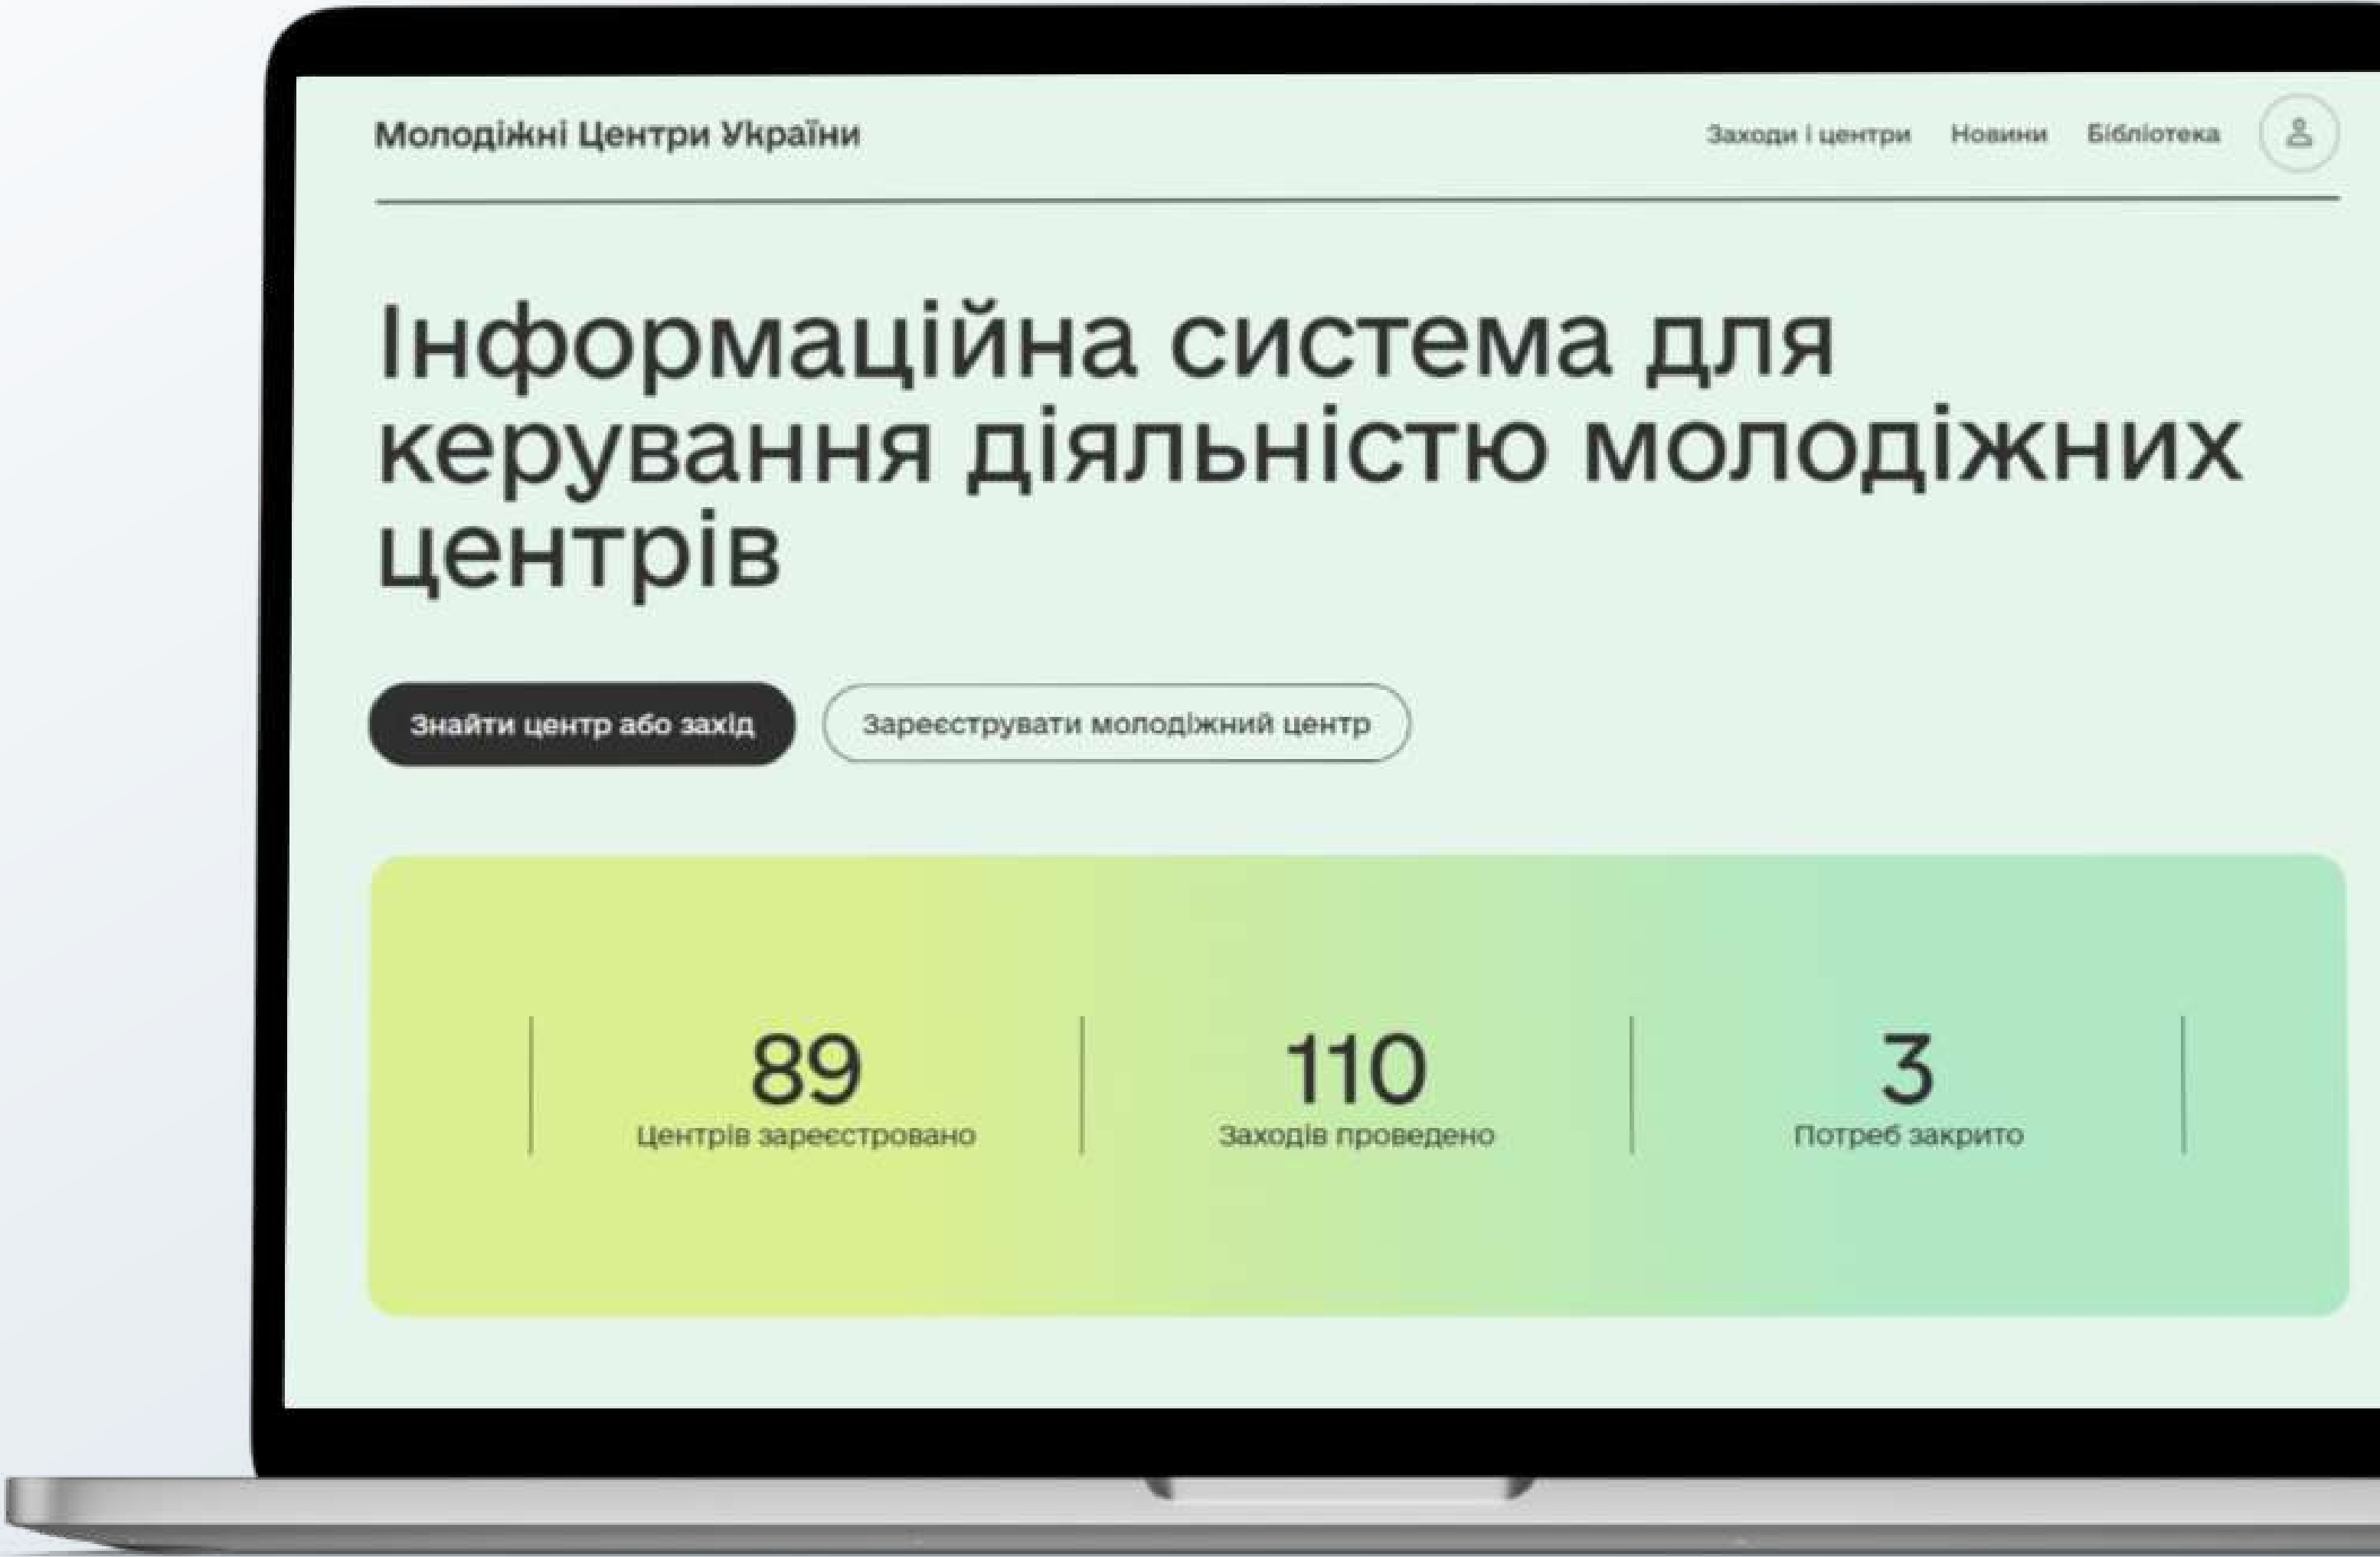

WEBSITE:
YOUTHCENTERS.MMS.GOV.UA

The system is intended for accounting of youth centers, their equipment, capabilities, damage and destruction of the premises of youth centers;
to organize a communication channel between youth centers and the governing organization; to disseminate information about youth centers and their activities

Another main function of the System is to inform people about the services that can be provided by youth centers

As well as simplifying interaction with people who can provide any assistance (donors) by publicly publishing information about state-verified MCs and contact details of verified MCs

The PHP-based Laravel framework and customized map server OpenStreetMaps were used to implement the project

ONMEDLINE: A PLATFORM FOR COMMUNICATION PATIENTS WITH DOCTORS

WEBSITE:
[ONMEDLINE.COM](https://onmedline.com)

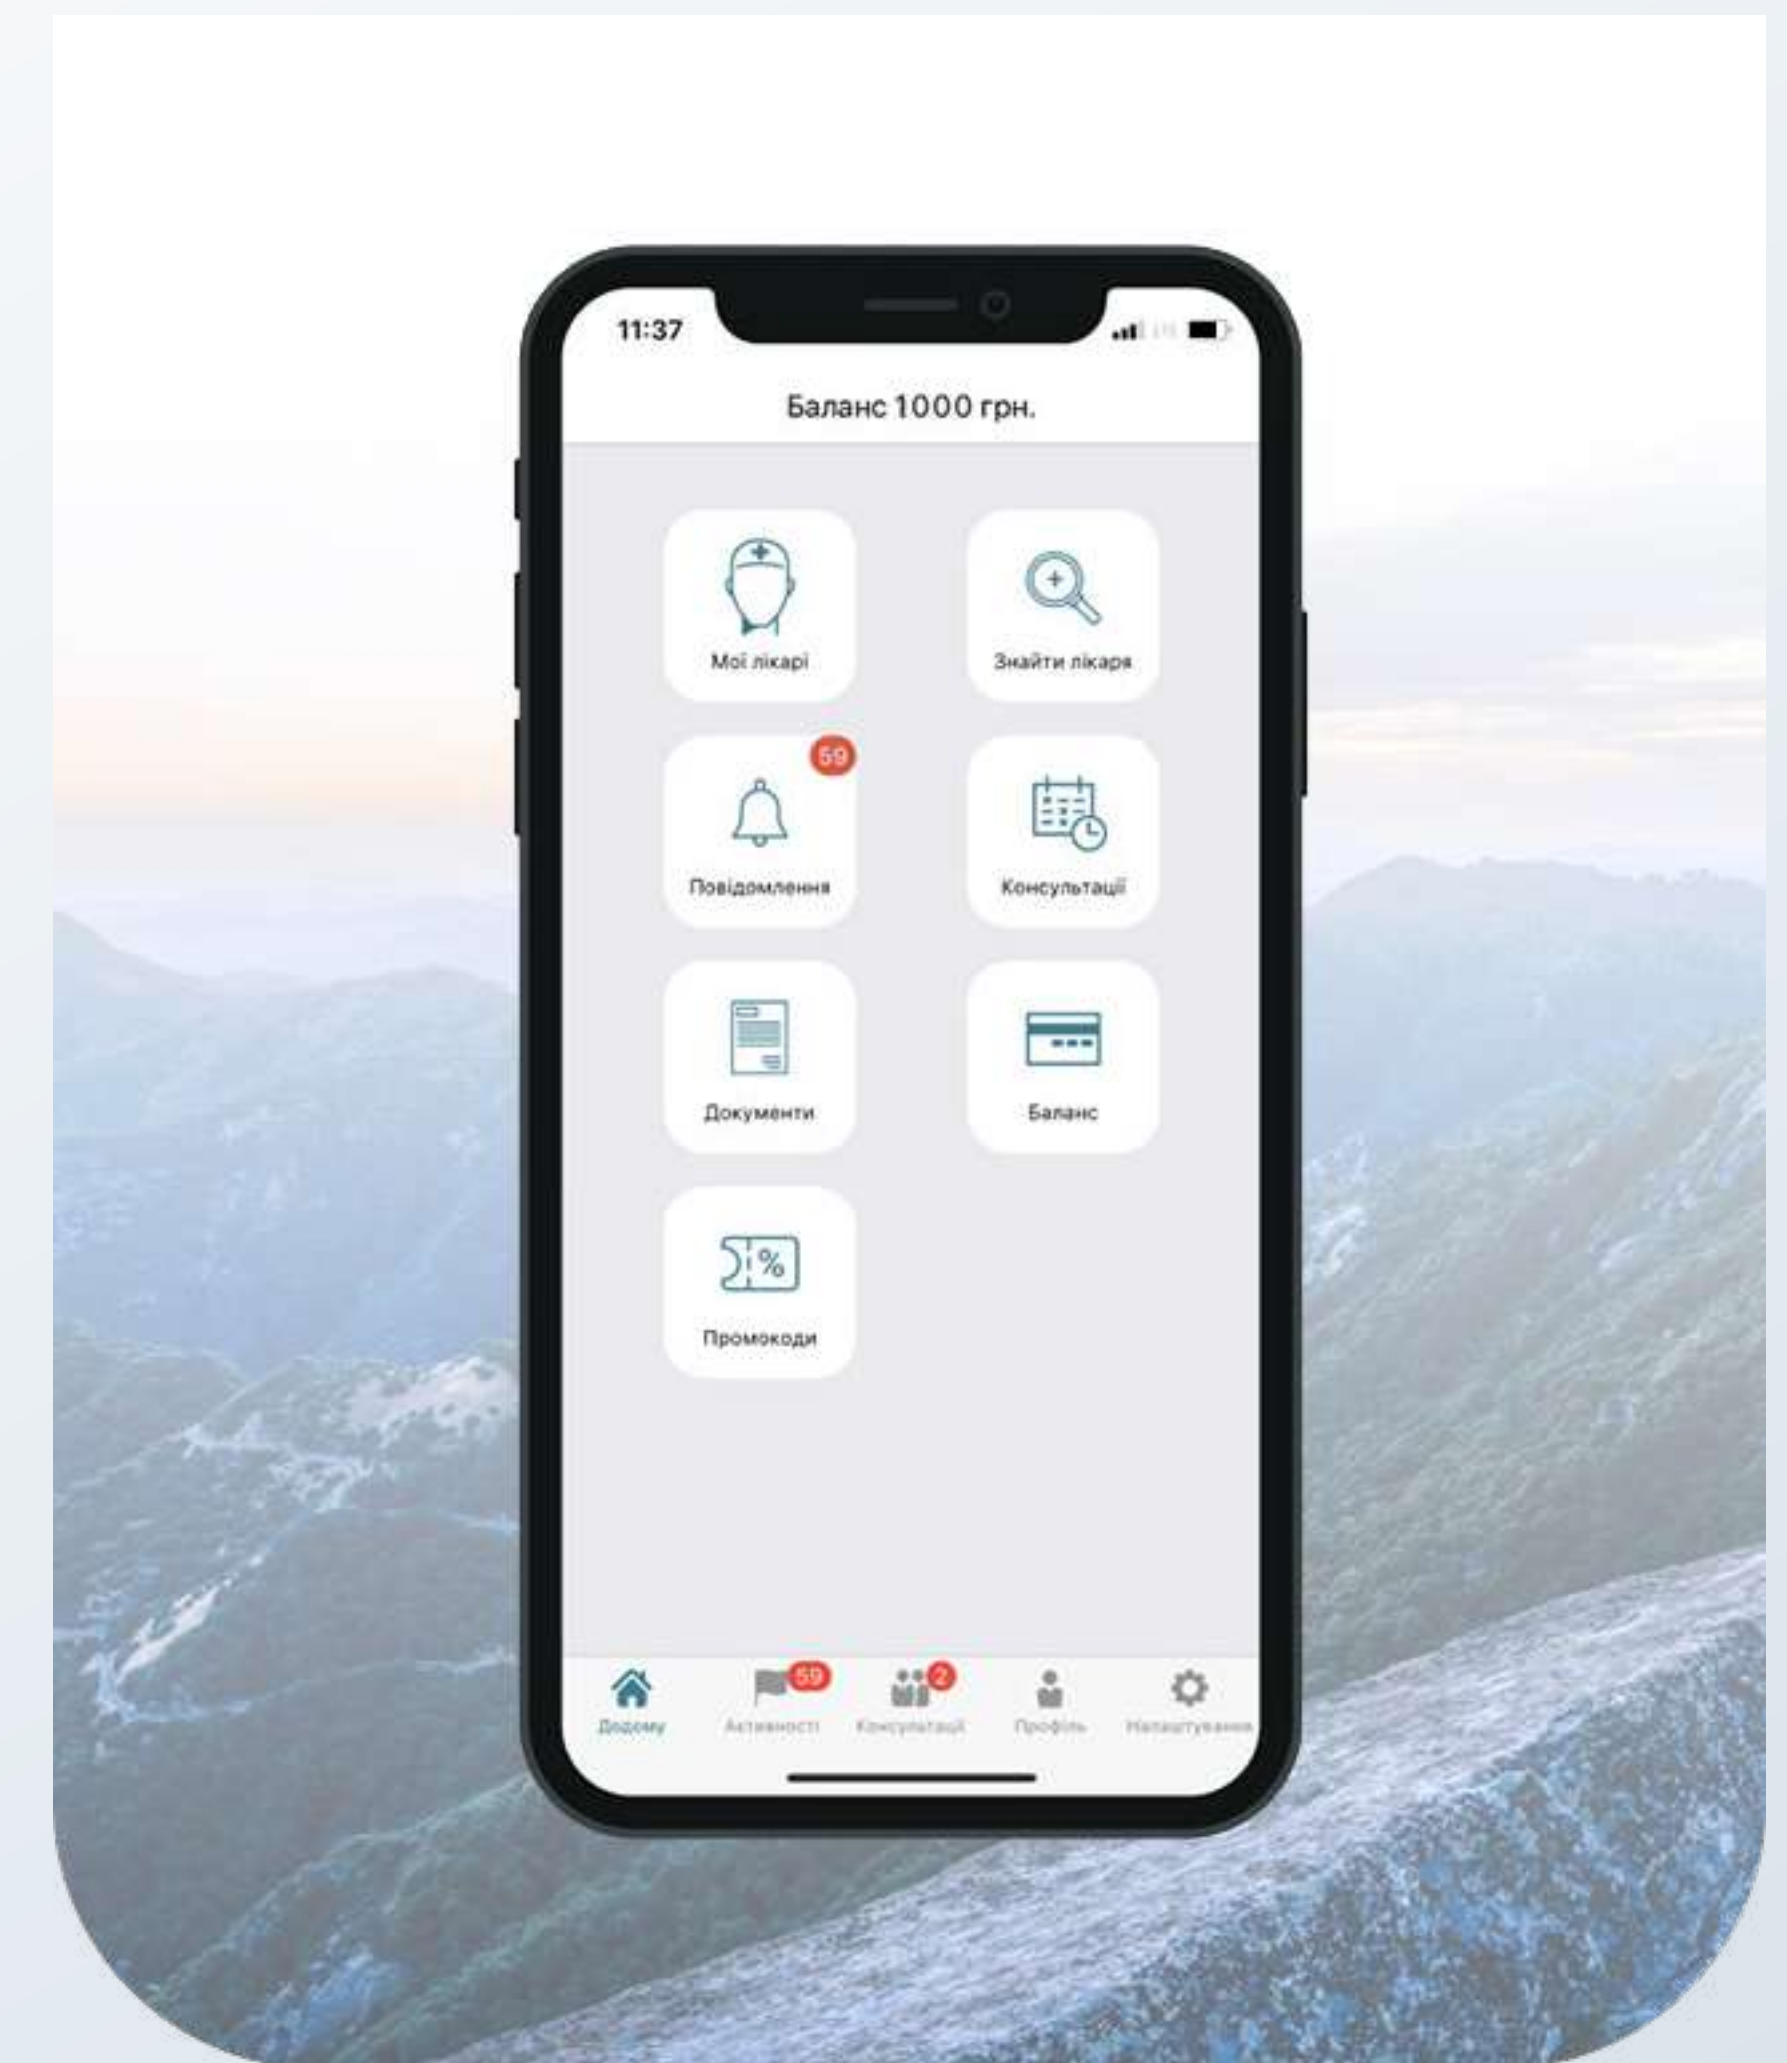

The service opens up new opportunities for users:

- Find only verified doctors in the service
- Communicate with a doctor at a distance
- Save time
- Communicate with the doctor at a convenient time
- Keep the contacts of your doctors
- Recommend specialists
- Learn medical news and recommendations on the topic of health

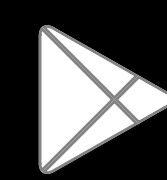

For doctors, the service opens up new opportunities:

- Structure communication with patients
- Determine your own work schedule
- Conduct online monitoring of patients' health
- Post author publications on onmedline.com
- Have access to specialized medical news

Technologies PHP, MySQL, SIP, WebRTC, iOS - Objective-C, Swift, SQLite, android - Kotlin, Java

MOSTVIDEO.TV: SPORTS HDTV CHANNEL

WEBSITE:
MOSTVIDEO.TV

Implemented applications for iOS, tvOS, Android, Tizen OS, Web OS, Duna, also developed channel website

Software has been developed for automatic management of ether

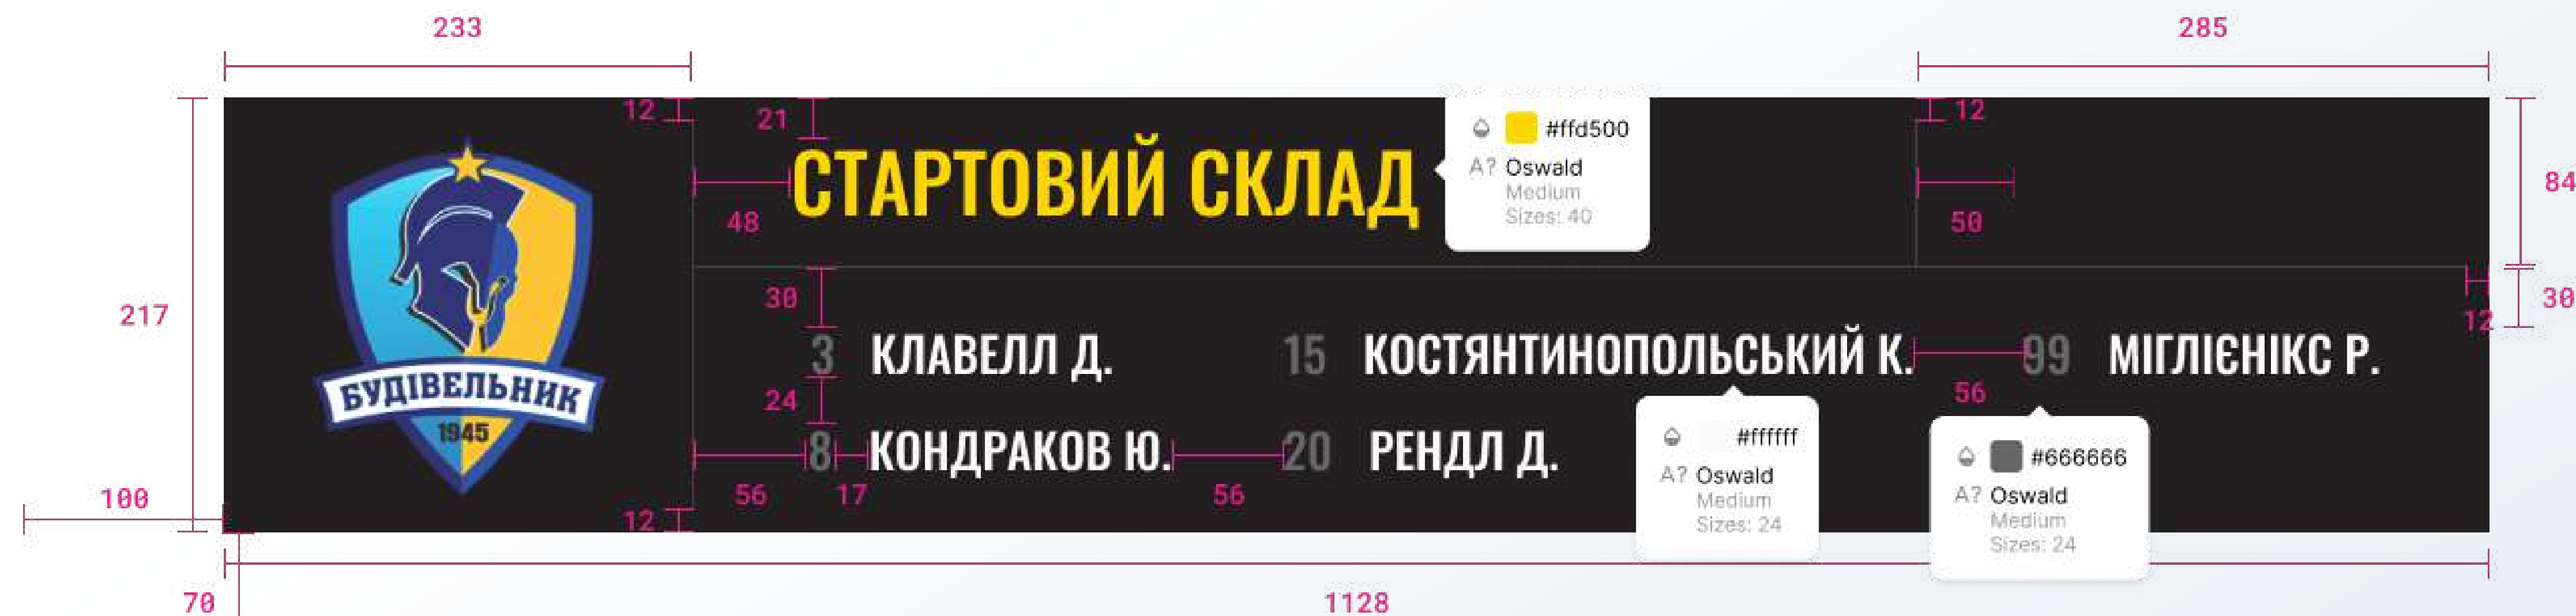

Installed, configured and supported server infrastructure on wowza, nginx

Languages and technologies:

PHP7, JavaScript, Swift, Objective-C, Kotlin, C#, XML, JSON

AUTOMATED SYSTEMS FOR SPORTS

Automatic match caption system for the Ukrainian basketball super league

Used to broadcast all league matches

Pairing with external equipment, data acquisition, display of the result on the director's console, and technical support have been developed

Caption systems of sports competitions

In close cooperation with MostVideo.TV, a number of caption systems have been developed for various sports competitions: basketball, football, hockey, handball, ring racing, competitions, tennis, MMA, boxing, various types of martial arts more than 70

Complex of software solutions and methods "Automation of sports marketing - Victory"

The system allows you to automate marketing processes in a sports organization, raise or create interest in a sports club (organization)

It is a set of software complexes that allow you to achieve high attendance and awareness of potential consumers (viewers, fans, fan groups) as quickly as possible.

DEVELOPMENT AND MAINTENANCE OF SPORTS AND OTHERS WEBSITES AND ONLINE STORES

DEVELOPMENT IS ONGOING, SOME PROJECTS REMAIN ON TECHNICAL SUPPORT. HERE ARE SOME OF THEM:

asmonaco.basketball

Marketing Champion in France and Europe for the most audience growth 2016-2020, A.S.Monaco Basketball Club

wwfc.ua

The official website of the World Warriors Fighting Championship with a Pay-per-view system, the first in Ukraine

mostvideo.tv

The first sports HDTV channel in Ukraine and mobile applications

asar.org.ua

Website of the Association of Arrhythmologists of Ukraine

neurocardiologist.info

Neurocardiologist publication site

AND MANY OTHER PROJECTS AND SOLUTIONS
